The image shows a 'New Spring Starter Project' dialog box. It has a title bar with a question mark icon and standard window controls. The main area contains several input fields and checkboxes. At the top right is a green power button icon. The fields are: Service URL (https://start.spring.io), Name (activiti), Location (E:\Workspaces\activiti) with a 'Browse' button, Type (Maven), Packaging (Jar), Java Version (8), and Language (Java). Below these are Group (com.ptm), Artifact (activiti), Version (0.0.1-SNAPSHOT), Description (Demo project for Spring Boot), and Package (com.ptm.prdemo). A 'Working sets' section has an 'Add project to working sets' checkbox, a 'Working sets' dropdown, and 'New...' and 'Select...' buttons. At the bottom are buttons for '< Back', 'Next >', 'Finish', and 'Cancel'. A watermark URL is visible at the bottom.

com.ptm.prdemo: debug # 不同目录下的日志可配置不同级别
#file: 日志文件, 绝对路径或相对路径
#config: 日志配置文件, Spring Boot默认使用classpath路径下的日志配置文件, 如: logback.xml
#Spring Boot中的logging.path和logging.file这2个属性, 只需要配置其中之一即可, 如果同时配置, 则使用logging.file属性

5.processes

activiti默认读取processes文件夹下的.bpmn文件或.bpmn20.xml文件并自动部署

```

2 <definitions
